

GEOGRAPHY

Teacher name: Andrew Featherstone

Exam board: Eduqas(WJEC)

Email address: andrew.featherstone@stockton.ac.uk

At Bede we study the Eduqas specification for Geography. In the first year you will study the following topics:

- *Changing Places* • *Tectonics* • *Glaciation*

At the end of year 1 you will sit two exams; Paper 1 covers Tectonics and Glaciation and Paper 2 covers Changing Places. On each paper there will be fieldwork and skills questions.

In the second year you will study the following topics:

- *Energy Challenges* • *Development in an African Context* • *Carbon and Water Cycles* • *Global systems and Global Governance* • *NEA (coursework)*

At the end of year 2 you will sit three exams; Paper 1 will cover all the Changing Places and Glaciation, Paper 2 will cover Global Systems and Global Governance along with water and carbon cycles and Paper 3 is a covers Energy, Africa and Tectonics

Week 1

Globalisation

Your task is to research the link between Globalisation and corona virus and produce this as report in word whilst considering the following points.

- What is globalisation
- How did globalisation lead to the spread of Covid 19
- How has globalisation impacted the management of corona virus
- How have the worlds economies been affected by corona virus
- Has been linked to other nations been a help or a hinderance to the UK?

This should amount to about 3 hours work. It would be best to use reliable news websites for this.

<https://www.ft.com/world>

Week 2

Piracy

Last week you saw the world was interconnected through Covid 19. This week we move onto piracy. Your task is to find answers to the following questions and complete this table.

Question	Answer
What is piracy and why does it happen?	
What locations are impacted by piracy. Is there any relationship between them?	
How have the worlds economies been affected by piracy?	
How can piracy be managed and do you think it will be effective?	

This should amount to about 2 hours work. It would be best to use reliable news websites for this.

Week 3

Energy

Our world is ever changing and energy is at the forefront of that change. I would like you to research the problems and benefits of fossil fuels vs renewable fuels. Your task is to research the 3 fossil fuels and 3 renewable fuels and outline which you think would be the most suitable for the UK to use. Produce an illustrated poster maybe in the form of a landscape.

I would consider:

- Cost
- Lifespan
- Effects on people
- Effects on the environments
- Benefits of the method
- Problems of the method

This should amount to about 3 hours work. It would be best to use reliable news websites for this.

Week 4

Tectonics

Tectonics is one of the most exciting topics and we are looking at what problems it can cause for both people and the environment. You are to find out the cause, effect and responses for the following case studies and produce a newspaper article focusing on 2 of these.

- 2010 Christchurch Earthquake
- 2011 Sendai Earthquake
- 2020 Stockton on Tees Earthquake
- 2010 Icelandic eruption
- 2020 Eruption on White Island, NZ
- 1995 Montserrat Eruption
